DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. §§ 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR § 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2 and 6, drawn to a DNA sequence encoding a plant dihydroorotase and use of said DNA sequence.

Group II, claim(s) 3-5, drawn to a protein with dihydroorotase activity.

Group III, claim(s) 7, 8 and 11-13, drawn to use of a DNA sequence encoding a plant dihydroorotase to identify inhibitors.

Group IV, claim(s) 9, 10 and 14, drawn to the use of a protein having dihydroorotase activity to identify an inhibitor.

Group V, claim(s) 15-18, drawn to a dihydroorotase inhibitor and a method of using said inhibitor to eliminate undesired vegetation.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The DNA sequence of Group I and the protein of Group II lack a corresponding special technical feature because DNA and proteins are compositionally, structurally and functionally distinct compositions of matter. Groups III and IV do not have the same corresponding technical feature because use of a DNA to identify inhibitors is distinct from use of a protein to identify an inhibitor. Groups I-IV do not have a corresponding technical feature with Group V because an inhibitor of dihydroorotase activity is structurally, compositionally and functionally distinct from a DNA sequence or a protein.

3. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

Art Unit: 1638

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).

Sequence Rules

5. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR § 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR §§ 1.821 through 1.825. Specifically, page 17, lines 15 and 17; page 18, lines 20 and 22; page 19, lines 37 and 39 of the Specification. Applicant must submit a CRF copy and paper copy of the Sequence Listing, a statement that the content of the paper and computer readable copies are the same and where applicable include no new matter as required by 37 C.F.R. § 1.821(e) or 1.821(f) or 1.821(g) or 1.825(d), as well as an amendment directing its entry into the specification.

Failure to comply with these requirements in response to this Office Action will result in ABANDONMENT of the application under 37 CFR § 1.821(g).
